

SYAHARANI NURULITA

Jakarta, Indonesia | syaharani2102@email.com | 0881010188415 | [LinkedIn](#) | [Portofolio](#)

PROFESSIONAL SUMMARY

Highly motivated and results-driven Information Technology student specializing in full-stack web development, software engineering, and game development. Proven track record of building scalable web applications and engineering complex interactive systems using modern frameworks (Laravel, Unity) and robust object-oriented programming. Adept at system analysis, database architecture, and API integrations. Seeking to leverage technical expertise and analytical problem-solving skills to drive high-impact software engineering initiatives.

EDUCATION

Universitas Bina Sarana Informatika

Jakarta, Indonesia

Bachelor of Information Technology (SI)

Sept 2022 – Present

- **GPA:** 3.68/4.00
- **Relevant Coursework:** Software Engineering, Application Development, System Analysis, Data Architecture, Database Management.
- **Academic Focus:** Developed an Adaptive Finite State Machine (FSM) based on player and enemy conditions for the 2D platformer game "Verdant Chronicles".

PROFESSIONAL EXPERIENCE

Ministry of Foreign Affairs of Indonesia (Pusdatin Kemlu RI)

Jakarta, Indonesia

IT Governance & Planning Intern

Sept 2025 – Dec 2025

- Authored and formalized comprehensive IT governance documentation, ensuring 100% compliance with strict government Standard Operating Procedures (SOPs) and minimizing administrative discrepancies.
- Streamlined structured data systems and digital infrastructure supporting national-level operations, optimizing data retrieval speeds and improving accessibility for cross-functional diplomatic teams.
- Conducted rigorous system audits and workflow analyses to identify bottlenecks, proposing technical solutions that enhanced overall IT resource allocation.

Kampus Merdeka (MSIB Batch 7)

Remote, Indonesia

Game Development Intern

Sept 2024 – Dec 2024

- Designed and implemented core gameplay logic and digital solution flows using Unity and C#, applying robust software design principles to accelerate development pipelines.
- Executed rigorous functional testing and Quality Assurance (QA) protocols within a collaborative Agile SDLC environment, identifying, documenting, and resolving critical software defects.
- Achieved 99% system reliability by optimizing code architecture and ensuring seamless integration of various game components across multiple developmental sprints.

KEY PROJECTS

Verdant Chronicles (2D Platformer Game)

Lead Programmer

- Spearheaded the end-to-end technical development of a 2D platformer game as a primary academic project, utilizing the Unity Engine and robust C# scripting.
- Engineered an Adaptive Finite State Machine (FSM) architecture to dynamically manage complex Artificial Intelligence (AI) behaviors, enabling enemies to react intelligently in real-time to varying player states and environmental conditions.
- Optimized physics interactions, memory management, and rendering pipelines within Unity, delivering a seamless and highly responsive gameplay experience.

E-Catering Platform (E-Commerce Web Application)

Full-Stack Developer

- Architected and deployed a highly responsive full-stack e-commerce platform using PHP, the Laravel framework, and MySQL to securely process and manage structured transactional data.
- Engineered real-time payment processing by seamlessly integrating the Midtrans Payment Gateway via webhooks, ensuring zero data loss during high-concurrency transactions.
- Fortified system security by implementing Google OAuth 2.0 protocols for user authentication, while refining frontend UI/UX to reduce page load latency by over 20% across all devices.

CERTIFICATIONS

Certified Program Analyst <i>Lembaga Sertifikasi Profesi (LSP)</i>	Oct 2025
IT Bootcamp "Software Development" <i>Universitas Bina Sarana Informatika</i>	Jun 2024
Database System Certification <i>PT Zahir Internasional</i>	Feb 2024
MikroTik Certified Network Associate (MTCNA) <i>MikroTik</i>	Jan 2024
PCAP: Programming Essentials in Python <i>Cisco Networking Academy</i>	Jun 2023

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, C#, Java (Familiarity), HTML5, CSS3.

Frameworks & Tools: Laravel, Unity, Git, REST APIs, Webhooks, Postman.

Databases: MySQL, SQL, PostgreSQL (Familiarity), Relational & NoSQL Database Concepts.

Core Competencies: Data Architecture, Distributed Systems, Software Design (OOP), Functional Testing (QA), Agile/SDLC, System Analysis.
