

SYAHARANI NURULITA

SOFTWARE ENGINEER

Jakarta, Indonesia • syaharani2102@email.com • 0881010188415
LinkedIn • Portofolio

PROFESSIONAL SUMMARY

Final-year Information Technology student (GPA 3.68/4.00) specializing in full-stack web development, data architecture, and system analysis. Experienced in building horizontally scalable systems with real-time transaction processing and robust relational databases (MySQL). Possesses foundational knowledge in Object-Oriented Programming (OOP) and NoSQL concepts, aligned with modern distributed systems. Seeking to apply strong analytical skills and best coding practices to drive high-impact technical initiatives as a Software Engineer.

EDUCATION

Universitas Bina Sarana Informatika

Sept 2022 – Present

S1 Information Technology (GPA: 3.68/4.00)

- **Focus:** Software Engineering, Application Development, System Analysis.

PROFESSIONAL EXPERIENCE

Ministry of Foreign Affairs of Indonesia (Pusdatin Kemlu RI)

Sept 2025 – Dec 2025

IT Governance & Planning Intern

- Developed IT governance documentation, ensuring 100% compliance with government SOP standards and reducing administrative discrepancies.
- Managed structured data and information systems supporting national operations, optimizing data retrieval processes for cross-functional teams.

MSIB Batch 7 – Game Development Track

Sept 2024 – Dec 2024

Certified Internship Program

- Analyzed system logic and designed digital solution flows, applying robust software design principles to scale operational performance.
- Conducted in-depth functional testing (QA) within a team-based SDLC, identifying and resolving critical bugs to ensure 99% system reliability.

KEY PROJECTS

E-Catering Platform (E-Commerce Web Application)

Full-Stack Developer

- Built a full-stack responsive e-commerce application utilizing MySQL and SQL for complex database management, securely handling structured transaction data.
- Integrated Midtrans Payment Gateway for real-time webhook transaction processing and Google OAuth 2.0, increasing user authentication efficiency.
- Implemented clean UI/UX and best coding practices, optimizing page load performance by over 20% and ensuring cross-device compatibility.

Verdant Chronicles (Interactive Software)

Programmer

- Engineered a responsive Finite State Machine (FSM) algorithm using C# and Object-Oriented Programming (OOP) to handle complex state management.

CERTIFICATIONS

- Certified Program Analyst (LSP - Analisis Program)

TECHNICAL SKILLS

Databases & Tools: MySQL, SQL, PostgreSQL (Familiarity), NoSQL Concepts, Laravel, Git, Unity.

Programming Languages: PHP, JavaScript, C#, Java (Familiarity), HTML5, CSS3.

Core Competencies: Data Architecture, Distributed Systems, Software Design, REST API, Webhooks, Functional Testing (QA).

Soft Skills: Strong Analytical Skills, Problem Solving, Detail-oriented, Team Collaboration.
